Summary

I started learning on my own, picked C# as my first language, and created a console game. While exploring Visual Studio, I found a scaffold for ASP.NET with React that's how I discovered web development, and I instantly knew it was the path I wanted to follow. Since I was mostly learning from YouTube videos and not often from official documentation, I realized I needed guidance. That's why I joined Telerik Academy, which I heard was intense and hard to complete exactly what I was looking for.
Since then, I've developed strong skills in front-end technologies, including HTML, CSS, JavaScript, TypeScript, and React, along with back-end experience in Node.js, Next.js, and databases like MongoDB and Firebase. I'm also familiar with UI libraries such as Tailwind CSS, Ant Design, and Chakra UI.
I am currently working on personal projects that are not uploaded to GitHub.

Freelance Projects

My Smart Health — 08/2025 - 04/2026

Learned how to do authentication and authorization with Auth.js, work with Prisma Postgres (Relational Database), how to store images and files in Vercel Blob Store and Hetzner Object Storage.

Technology Stack Next.js, React.js, Type Script, TailwindCSS, Daisy UI, Auth.js, JWT, Prisma, PostgreSQL, Vercel Blob Store, Hetzner Object Storage, Swiper

https://www.mysmart.health/

Personal Projects

Todo Zustand — 05/2025 - 06/2025

I wanted to use Zustand (state management system), so I created a system similar to Trello. All tasks are stored in the browser memory of your device, so they can be used without logging in. I didn't want to use a third-party library for drag events, so I used the Drag and Drop API, which helped me understand it better.

Technology Stack React.js, Next.js, JavaScript, TypeScript, Zustand, Tailwind CSS, Git

https://github.com/Radoslav-Marinovv/todo-next-zustand

https://todo-next-zustand-blue.vercel.app/

Currency Converter — 02/2025 - 04/2025

Convert from USD (as Base) to 33 other currencies, used Redux, Express.js, the new TailwindCSS(v4) implementation. Learned how to use Vercel configuration file so i can run both front-end and back-end (as Vercel function) on same deployment.

Technology Stack React.js, Redux, JavaScript, TypeScript, Express.js, MongoDB, Tailwind CSS, Git

https://github.com/Radoslav-Marinovv/currency-converter

Fitness Tracking Application: Motion Mate — 06/2024 - 06/2024

A group project from Telerik Academy. My tasks were to create an authentication, a Goals page, create a binding between completed exercises and corresponding goals, a friends list, and collaborate with the other two team members.

Technology Stack React.js, JavaScript, Firebase, Tailwind CSS, daisy UI, Git

https://github.com/A58-Agents-Team1/Motion.Mate

Skills

Front-End

JavaScript, TypeScript, React Redux, Zustand, HTML, CSS

Back-End

Express.js, Next JS, C#

Database

MongoDB, Firebase, PostgreSQL

Tools & Libraries

Git, GitHub, ESLint, Jest, Axios, mongoose, Prisma, Tailwind, Chakra UI, Ant Design, GSAP, Figma

Soft Skills

Teamwork, Communication, Problem solving

Education

Alpha JavaScript Track
Telerik Academy
Sofia, Bulgaria
01/2024 - 06/2024

Bachelor's degree, Accounting
VUZF
10/2009 - 07/2013
Sofia, Bulgaria

Languages

Bulgarian, English

Other Experience

Hotels & Restaurants

06/2008 - 12/2019

With over 10 years of experience as a waiter and bartender in 5-star hotels and restaurants, I had the opportunity to work at some of the top establishments in Sofia, including Kempinski Hotel Zografski, Hotel Marinela, and Chef's Live.
